Rhythm Master – Final Beta, RC Checklist & Known Issues

Platforms: iOS Safari • Android Chrome • WAX Cloud Wallet

1. Tester Sign-Off

Each tester must complete the checklist below and sign before the build can be promoted to Release Candidate (RC).

Tester Name	Device / OS	Browser	Date	Signature

2. Release Candidate (RC) Checklist

■ All beta checklist items passed on iOS Safari and Android Chrome

■ No scroll locking outside gameplay area

■ Orientation change pauses and resumes gameplay correctly

■ Audio/video sync stable after pause, resume, and restart

■ No uncaught JavaScript errors in console

■ WAX Cloud Wallet login stable

■ Season Pass NFT gating verified

■ Admin bypass verified

■ Leaderboard saves and loads correctly

■ Game restart does not duplicate notes

■ Performance stable for tracks over 5 minutes

■ UI safe areas respected (notch, dynamic toolbar)

■ All known beta issues documented below

3. Known Issues (Beta)

- **iOS Safari:** Minor audio latency may occur when switching Bluetooth devices during gameplay.

- **Orientation Changes:** Rapid multiple orientation flips may cause a brief visual flicker before pause overlay appears.

- **Low-End Android Devices:** Reduced particle effects performance during intense spark effects.

- **Network Instability:** WAX login may fail silently if network drops mid-authentication.

- **Very Long Sessions:** Sessions exceeding 30 minutes without reload may experience minor memory buildup.

These issues are non-blocking for beta but must be reviewed prior to full production release.
